While the stock market was not specially active to-day, a more confident and hopeful fee! ing pervaded all departments of the Stock Exchange. The trading was largely professional, but in not a few instances advances were due, in but in not a few instances advances were due, in part at least, to buying for investment. The gains of nearly 1 per cent in Rock Island, Chicago, Burlington and Quincy and, indeed, in all the leading Granger shares, were justified by the steadily increasing business of those lines, while the steady of European interest. Louis-wild and Nashville gained 1 per cent, and on moderate purchases Lake Shore advanced nearly 2 per cent. For the movement, which was in sharp contrast with that of yesterday, there was the excellent reason of a further fall in rates of foreign exchange in addition to the reduction of 1 per cent in the official rate of discount of the Bank of England. No shipments of gold can be made at the present rates of exchange, while greater confidence at home and abroad encourages bankers to draw more freely in anticipation of increased exports of grain and merchandise. Moreover, bankers with European connections were liberal lenders of morey, a fact which adds to the strength of the belief that withdrawals of foreign capital have ceased for the present. The demand for currency from Western points was not appreciably relaxed, and shipments that were made known exceeded \$1,000,000. In the week the amount sent from this city is considerably over \$6,000,000. It is thoroughly understood, however, that this movement is an exceptional one, and that the occasion is likely soon to pass away. At Chicago the alarm appears to have entirely subsided, and with a restoration of confidence there is every reason to expect a prompt return of the currency which was needed merely to meet a special emergency. part at least, to buying for investment.

emergency.

The conspicuous exception to the common course of prices was furnished by Philadelphia and Reading, which, after an early advance to 18, fell 2 per cent, and at 161-4 ended with a comparative loss of 1 per cent. Deposits of general mortgage bonds under the reorganization plan have not been so large that the success of the scheme can be considered certain, and it it should fall through there would seem to be no escape from foreclosure of the general mortgage.
